

BIEXO

FABRICANT DE RÉSERVOIRS
TANK MANUFACTURER INC.

BENCH TANK

TKB1140

BIEXO

MAIN FEATURES:

- Made from 11 gauge steel.
- 3/16" work surface.
- Can store one, two or even three different lubrication products.

OPTIONS:

- Double shelves or without shelves on request.
- Interior and exterior epoxy paint.

ALL MODELS ARE:

- UL/ULC certified.
- Also available with double walls.
- Equipped with a 2" fill cap, 2" vent, 1 1/2" gauge and an emergency vent.

SPECIAL PROJECTS

MAIN FEATURES:

- Ideal for remote, difficult to access locations where the delivery of bulk oil is impossible.
- Facilitates plastic tank switching without the need to connect to your equipment each time.
- Designed to protect your equipment from shocks.

MAIN FEATURES:

- Economic model, gravity fed.
- Air operated oil supply, more affordable and less maintenance.
- Perfect for storing various types of oil.

BIEXO

BIEXO

BIEXO, EXCEEDING STANDARDS

Oil storage is often a source of stress. Beyond the practical costs associated with spills there are also the environmental costs. At BIEXO, we understand the concerns of our customers. To make life easier for bulk oil users we have designed modular and safe solutions that **go beyond the standard**.

All of our large tanks (≥ 1137 liters) are equipped with a **reinforced internal structure**. The top of our bench tanks is made from **thick, high quality steel sheets**¹ that can withstand up to 150 kg / 250 lbs² without deformation.

To reduce the risk of oil spillage due to impacts, we offer **double-walled tanks**. To ensure additional safety, all of our tanks can be equipped with retention ponds.

Small details are important to us because they provide you with the confidence you need to focus on what really matters, **your customers' satisfaction**.

MAKE ROOM FOR REAL BUSINESS...

Space optimization is a common challenge among our customers. To address this, BIEXO has designed **compartmentalized and modular** tanks that can be stacked, making it possible to store different kinds of oil in the same tank and at the same time reducing floor space to a minimum.

At BIEXO each customer is unique. Therefore, we have developed the expertise to create custom tank to meet the needs of all of your special projects.
